

O R D E N A N Z A N° 28/93.
CRESPO - E.RIOS, 23 de Junio de 1993.

V I S T O:

La presentación realizada por el Señor Alberto Marcelo GIMENEZ, y

CONSIDERANDO:

Que en la misma solicita le sea concedida una refinanciación especial para abonar el monto adeudado y que corresponde a la obra de desagües cloacales establecida por Ordenanza N° 56/88, de la propiedad Registro N° 4489, Manzana N° 204, Partida Provincial N° 178170 sobre calle Sargento Cabral N° 204 de Crespo.-

Que este Honorable Concejo Deliberante considera atendible la solicitud realizada, dada su situación socio-económica y la familia numerosa que tiene a cargo.-

Por ello

/RG - This option removes validation and recovery data from a file or files validated with the /AG option. Using the /RG switch against a drive removes the SCANVAL.VAL file. This option can not be used with the /AG option.

/RV - This option removes validation codes from a file or files validated with the /AV option. Using the /RV switch against a drive removes the SCANVAL.VAL file. This option can not be used with the /AV option.

/SAVE - This option stores any listed options for subsequent executions of SCAN. The options are stored by modifying the SCAN.EXE executable file itself. For example:

```
SCAN /NOMEM /REPORT C:\SCAN.LOG /NOPAUSE /SAVE
```

saves the default options to /NOMEM, /REPORT C:\SCAN.LOG and /NOPAUSE and will cause SCAN to use these options the next time

it is run. If SCAN is run with only the /SAVE switch, all
saved options are removed and the SCAN.EXE is returned to normal. If
you do not wish to modify the SCAN.EXE file, use the
@{filename} option instead.

NOTE: VALIDATE 0.4 must be used to validate SCAN V89 or above
if the /SAVE option is used. /SA
